Manual for WordPress Plugin
"TemplateHelp Featured Templates" version: 4.1.2.

INSTALLATION
STEP 1. Download zipped plugin using the link below:
http://wordpress.org/extend/plugins/template-help-featured-templates/
STEP 2. Unzip your widget and upload it on your server in: /wp-content/plugins/
STEP 3. To activate the widget you need to log in to the wp-admin area of your wordpress blog.
Then go to "plugins" to find "Theme Widget from Template-Help" in the list of the plugins available
and click "Activate".
STEP 5. To install the widget on your blog go to Appearence -> Widgets (in the admin area of
your blog). Choose "TemplateHelp Featured Templates" in the available widgets, and drag and
drop it to either the left or right sidebar of your blog.

SETTINGS
- *Widget title*: give a name to the templates gallery on your blog.
- *Language*: choose the language of your widget.
- *Currency*: choose the currency of your widget. The exchange rate will be always up to date.
- *Affiliate ID*: N.B.! Make sure you use correct TemplateMonster.com Affiliate ID. If you are not sure about
the correct Affiliate ID - contact your Affiliate manager: http://www.mytemplatestorage.com/contact-us/
- *WebAPI Password*: your API password is assigned to your affiliate in your
http://www.mytemplatestorage.com/ account , usually - it is a long set of numbers and digits (32
characters).
- *Checkbox: I want to sell through TemplateMonster.com*: **if you enable this checkbox** - your visitors will
be forwarded to TemplateMonster.com with your affiliate paramater and their sales will be added to your
commissions.
If you do not check it:
- *Radio Button: I want to sell through my affiliates shop*: your visitors will be forwarded to your Preset. You
will need create preset beforehands. More about Presets:
http://www.mytemplatestorage.com/affiliate-tools/webapipreset/
- *My Preset code*: The unique code that you receive when you create a preset. It is a long set of numbers
and digits (30 characters)
- *Radio Button: I want to sell through my Ready Made Shop:* your visitors will be forwarded to your
Ready-Made shop. Here is more information about RMS2:
http://www.mytemplatestorage.com/affiliate-tools/rms/
- *Shop URL*: the URL of the Ready-Made Shop that you previously installed on your server.

- *Display template's information*: Choose if you want to display a full template info (with prices) or a shorten
one (without prices).
- *Randomize*: if you choose NO - templates will be displayed: newest first. If YES - choose the depth of
randomization (should be more than *Number of templates to display*) - templates will be shown randomly.
- *Categories*: you can choose to display all categories or 1 of them.
- *Types:* you can choose to display all types of CMS or 1 of them.
- *View All Button*: show/not show the button View All.

- *URL(optional)*: link to the website where you want to lead your visitor. If the field is empty - the button View All will not be displayed.
- *Title(optional)*: title on View All Button.
- *Link Target(optional)*: link attribute: target. If you type "blank" - View All button will open in new tab. If leave the field empty - link will be opened in the same window.

STYLE CUSTOMIZATION
All styles are located in: /wp-content/plugins/template-help-featured-templates/css/style.css
Feel free to customize CSS styles of your widget. Make sure you have a backup of your original style.css file.

USAGE
1. Make sure you filled in all the necessary fields correctly. Pay special attention to: affiliateID, API password and Preset code (if you chose to lead your customers to your own shop).
2. You need to think if you want to forward your visitors to your own resources (your preset or ready-made shop) or to TemplateMonster.com
3. Then think which categories and CMS types could be interesting for your visitors and feature them.
4. If you want to edit styles of the widget - feel free to modify the style.css file in the folder with plugin.
5. If you face any difficulties or have any questions - contact our Affiliate team:
http://www.mytemplatestorage.com/contact-us/

SHORTCODES
1. Basic look of shortcode:
[th_ft count="%number%" title="%your-title%" cat="%category-number%" type="%type-number%" lang="%language-name%"]
2. Parameters:
